## **REASON FOR SUPPLEMENTAL MEMO**

To correct certain references and add information to the Analysis section of Item 4.5, dated February 25, 2004.

## **ANALYSIS**

Based on discussions with Cisco Technology Inc., the actual number of houses proposed to be built by Cisco on the adjoining property will be 720 units, not 860 units as mentioned in the original memo. Also, these units will be various types of dwellings and will not all be single-family detached houses.

On another subject, it is important to inform Council that in accepting this property, the City has negotiated an environmental provision with Cisco, whereby the City waives all right to seek redress from Cisco from environmental contamination on the property except for such contamination as may have been deposited onto the property by Cisco itself. The City has performed a Phase I review of the environmental condition of the property, however, and found no condition on the property that raises concerns.
