

Statement of **CRAIG MANN**, Candidate for
Member, San Jose City Council, District 8

Occupation: Vice President, County Board of Education/Classroom Teacher
Education and Qualifications:

Evergreen deserves a City Councilmember with the experience to refocus San Jose City government on the basics: reducing traffic congestion, improving public education, enhancing safety and neighborhood services.

As a classroom teacher, elected school board member for 10 years, high-technology manager for 20 years and with a MBA degree, I'm the only candidate with the necessary combination of public and private sector experience to transform City Hall's focus from politics as usual to real solutions that benefit our neighborhoods.

I'm a results oriented leader who listens to the community and I'm not afraid to stand up to the special interests to enact change. I have done it as your school board member and as a manager in the private sector.

As Evergreen's representative, I will stand up to the developers and corporate interests who have too much influence on City Hall. I'll work for managed growth that aids job creation but also eases traffic, limits the overcrowding of our schools, and doesn't break San Jose's budget.

I have the right Experience for Evergreen and as your servant, we will work together to achieve the change we want. Please visit www.craigmann.org for more about my experience and plans. I sincerely request your vote.
