**Application of tables** - The above table is based on an assumed average inspection hours per category and an hourly rate of \$206. Inspection service hours equivalent to the cap or base hours will be allotted. If additional categories are identified that are not listed above the same fee methodology will be applied. While this table is intended to calculate fees for various project types, if the scope of work necessary for a particular project is significantly more or less than the fee calculated herein provides, the Building Official may adjust the fee assessment to better reflect the scope of service.

**Multi-Unit Residential Permit Fees (Hotels, Motels, Apartments, Condominiums)**

**New Construction** – Separate inspection hours are calculated for the residential units, the garage structures and any commercial uses

**Residential Unit Fees** - Non living unit sq ft that is supportive to the residential units, (laundries, offices, recreation rooms etc.) are added to the total sq ft of the residential portion of construction. The total sq ft of the residential portion of the project (including support areas) is divided by the sum of the number of living units and support areas in the structure being permitted to derive an average sq ft per unit. The hours associated with average unit size listed in the table below are multiplied by the number of units and then the Construction Material Modifier to derive the base inspection hours per trade. The hourly rate for inspection services is \$206 per hour.

**Building, Plumbing, Mechanical, and Electrical formula**

# of Units x Service Hours Per Unit (A) x Construction Material Modifier = hours assessed (rounded to closest 0.5 hour).

<b>Average Sq Ft / Unit</b>		<b>Service Hours Per Unit (A)</b>			
		<b>Bldg</b>	<b>Plumb</b>	<b>Mech</b>	<b>Elect</b>
0	1,000	2.50	1.00	1.00	1.00

2,001	2,500	4.00	1.00	1.00	2.50
2,501	& Greater	4.50	1.00	1.00	3.00

**Multi-Unit Garage Permit Fees** are calculated as follows:

$((\text{Sq ft of garage} - P)/1,000) \times \text{Area Modifier (B)} + \text{Base Hours (A)} = \text{adjusted hours}$ ,  
multiplied by a Construction Material Modifier (C) = hours assessed.

**P** = The maximum value of the previous square footage bracket. For example, the first part of the formula for a project of 20,000 sq. ft. is  $(20,000-10,000)/1,000$  or 10.

**Non-Residential**

Building and Combination Permit Fees shall be \$206.00 per hour for inspection time expended or the amounts set forth below, whichever is greater. These Building Permit Fees are in addition to the Permit Issuance Fees set forth in Section 3.350. Multiple numbers of any fixed item assessment listed in the table below will be incremented for each permitted trade as follows – 2 to 3 fixtures equals an additional half hour (0.5 hours), 4 or more fixtures equals an additional hour (1.0 hours).

**Time Assessments Based on Project Type** - Separate fees are calculated for the shell, the finish interior and garage and are added together when applicable.

**Shell fees** are calculated as follows:

**Building, Mechanical, and Electrical formula**

$((\text{Sq ft of building} - P) / 1,000) \times \text{an Area Modifier (B)} + \text{Base Hours (A)} = \text{adjusted hours, multiplied by a Construction Material Modifier (C)} = \text{hours assessed (rounded to the closest 0.5 hour)}$ .

**Plumbing formula**

$(\text{Base hours (A)} + \text{Plumbing Area Modifier (B)}) \times \text{Construction Material Modifier (C)} = \text{hours assessed (rounded to the closest 0.5 hour)}$ .

**Application of tables** - The above table is based on an assumed average plan check hours per category and an hourly rate of \$210. Plan check hours equivalent to the base hours will be allotted. The base fees provide an unlimited plan check time in the first review cycle and two additional hours in the second cycle.. If additional categories are identified that are not listed above the same fee methodology will be applied. While this table is intended to calculate fees for various project types, if the scope of work necessary for a particular project is significantly more or less than the fee calculated herein provides, the Building Official may adjust the fee assessment to better reflect the scope of service.

**Multi-Unit Residential Plan Check (Hotels, Motels, Apartments, Condominiums)**

Multi-unit plan check fees are based on an hourly rate of \$210 applied to the anticipated number of plan check hours derived from the tables below. Separate plan review hours are calculated for the residential units, garage structures, and commercial uses, if any.

**Shell fees** are calculated as follows:

The number of unique units in the project multiplied by an area modifier plus base hours plus 2 hours for each building equals the review hours assessed per trade.

**Building, Plumbing, Mechanical, and Electrical formula**

(# of Units – P) x Area Modifier (B) + Base Hours (A) + (2 x # of buildings) = adjusted hours, multiplied by a Construction Material Modifier (C) = hours assessed (rounded to the closest 0.5 hour).

P = The minimum value of the applicable unit count bracket in the table below. For example, if the unit count is 80, then the first part of the formula is (80-51) or 29.

		<b>Multi-Family Base Hours (A)</b>				<b>Area Modifier (B)</b>

P = The maximum value of the previous square footage bracket. For example, the first part of the formula for a project of 20,000 sq. ft. is (20,000-10,000)/1,000 or 10.

**Time Assessments Based on Project Type** – Separate fees are calculated for the shell, the finish interior and garage and are added together when applicable.

**New Commercial/Industrial Construction** – Separate fees are calculated for the shell, the finish interior and garage and are added together when applicable.

Area modifiers for Building, Mechanical and Electrical are all different (due to time investment scaling at different rates based on size) and are not utilized for Plumbing at all. The area modifier assesses a time for every 1,000 sq ft of a building and is added to a base hour assessment associated with a given sq ft range. The separate number of plumbing areas that exist in the building determines the Plumbing Area Modifier. The Plan Check hourly rate is \$210 per hour.

**Shell Fees** are calculated as follows:

**Building, Mechanical, and Electrical formula**

$$(((\text{Sq ft of building} - P) / 1,000) \times \text{an Area Modifier (B)}) + \text{Base Hours (A)} = \text{adjusted hours, multiplied by a Construction Material Modifier (C)} = \text{hours assessed (rounded to the closest 0.5 hour)}.$$

**P** = The maximum value of the previous square footage bracket. For example, the first part of the formula for a project of 20,000 sq. ft. is  $(20,000-10,000)/1,000$  or 10.

**Plumbing formula**

(Base hours (A) + Plumbing Area Modifier (B)) x Construction Material Modifier (C) = hours assessed (rounded to the closest 0.5 hour).
