Subject: The District 6 and District 9 redistricting appears bias aganst District 6

Yes, the redistricting is necessary because of the census.

However, having a 11 member team that has a representative from one district and not the other is clearly creating a bias. This team needs to be changed.

I believe as do all my neighbors that District 6 should remain in Willow Glen. I also believe that the committee should NOT have any representative who might have an political interest in having one choice over the other.

The press should investigate.
